

Achieving the 6S Storeroom

How SDI reorganizes, streamlines and transforms your dysfunctional storeroom into an optimized 6S Storeroom. In other words, how we...

THE STOREROOM REALITY

It's too easy for manufacturers to get caught up in day-to-day operations to address the challenges of an inefficient storeroom. They'd love to **make the turn** from reactive to proactive, to drive the savings they KNOW are possible, but in-house resources typically just aren't there. And the years go by...

A 6S TURN FOR THE BETTER

Storeroom reorganization is in SDI's wheelhouse. Leveraging LEAN, Six Sigma and 6S principles and methodologies, we assess your current storeroom and implement a plant-proven plan of attack to propel your storeroom to where it needs to be.

This includes data capture, item verification, QR codes, organization by commodity and machine, detailed counts to capture accurate quantities, improved receiving processes, plus new approaches to handling non-conformance, discrepancies and returns.

BENEFITS OF HAVING SDI TURN IT!

- Improved wrench time
- Improved inventory visibility and accuracy
- Improved safety
- Fewer stock outs
- Better control over excess and obsolete inventory
- Less working capital tied up in inventory
- Improved end-user satisfaction
- Higher productivity overall

TYPICAL 30-45 DAY PROCESS

Each project is transacted through a **purchase order**, not a contract, so you avoid drawn-out contract negotiations and lengthy consensus approvals.

- Evaluate existing receiving area and storeroom organization
- Design **6S** receiving area
- **Sort** receiving & stores area
- **Set in order**
- **Shine**
- **Standardize**
- **Sustain**
- **Safety**
