

Part of moving from a **crisis response** stage to a **future planning** stage is defining how your company will manage risks to ensure business continuity. **SDI's PPE Supply Chain Assessment** helps you evaluate procedures so you can learn, apply, and improve.

COVID-19 Has Changed Everything

Companies have been forced to innovate as the pandemic changed the status quo literally overnight. Our PPE Supply Chain Assessment will capture these new practices and help you evaluate them so you can make improvements and apply them to your continuity planning and ongoing supply chain metrics/KPIs.

Overall Assessment Goals

- Document lessons learned during COVID-19 specific to your plant and in relation to the overall manufacturing environment
- Identify unique challenges or conditions
- Identify primary areas of risk & opportunity
- Provide Actionable analytics, insights and recommendations that can be implemented to mitigate future supply chain risk

Logistics

The assessment will be conducted on-site and will include a walk-through of your plant/facility as well as interviews with pre-determined site personnel to capture and document lessons learned. We'll focus on questions that relate to your specific site needs:

- What was expected to happen?
- What actually happened?
- What went well, and why?
- What can be improved, and how?

Data Evaluation

SDI will also identify, collect and analyze supply and spend data to drive insights for future events that may negatively impact individuals, assets, and/or the environment.

The Result

- Documented lessons learned to be incorporated into business continuity plans
- Practical recommendations for mitigating future supply chain risk
- WAVE/phased plan for sourcing PPE and essential materials
- Insights specific to your plant/facility regarding where you stand in relation to competitors

The Essential PPE Supply Chain

This is a critical component in your plan for a COVID-safe environment – it's also potentially the weakest link. Organizations can better understand this essential supply chain, and take action to mitigate against future supply shocks, by working with SDI. We'll augment your sourcing strategy with specialized resources available 24/7 and diversify your supply base through our vetted network – and 50 years of supply chain experience.
